Multipole™ 300 Series Accessory System

The Multipole™ 300E (Estate Series) is a Multi-function pole system that has been designed to offer a low cost aluminium pole that is aimed at developers of broad acre land sub-divisions but remains future proofed to accept technology that changes over time. Key benefits include:

- Integrated accessory mounting system to allow attachment, removal and retro-fitting of equipment over time.
- High capacity base section to incorporate items such as 3-Phase power outlets.
- Capable of carrying small banners, CCTV, Wi-Fi and signage.
- Fully certified lightweight aluminium structure enabling reduced installation and transport costs.
- Range of finishes – mill, anodised or powder coated.
- Low carbon footprint and corrosion resistant.

Poles can be fabricated with multiple hatches and a range of heights and light arm configurations.
